Subject: RE: IIC Updated Medical Information Draft

Kamerron, the only thing I tried to add to the bill was the inclusion of "at no charge" for the first sentence of 404.01. There is a statement that the provision of records to the patient will be at no charge, but the initial provision should also be at no charge – correct?
In addition, should there be an option to provide these records in an electronic manner? That is the way things are going now.
Thanks and I am sorry I will not make it to the meeting today.
On it goes!

Good morning,

Attached is an update version of the draft language for medical information for the meeting on Tuesday.

Thank you,

Kamerron Slay
