### **Idaho Industrial Commission and Verisk Analytics/ISO Announce Launch of EDI Claims Services Website**

(BOISE) – The Idaho Industrial Commission (IIC), in association with Verisk Analytics/ISO, announced today that the new Electronic Data Interchange (EDI) Claims website is now available at <https://iicedi.info/>.

Rolled out on January 25, 2017 the EDI involves a computer-to-computer exchange of data in a standardized format. That enables hundreds of different documents to be efficiently and legally exchanged. The EDI Claims 3.0 program, which will be implemented in July, will rely on use of the new website and will prepare the IIC for more efficient and accessible data processing for the average of 35,000 claims received each year.

Alongside with the website's launch, an Implementation Guide also is available to help users understand how to conduct EDI business with the IIC while providing references to other important documents. It is available for download in the Implementation Guide Page of IIC EDI Claims website: <https://iicedi.info/guide>.

EDI Claims 3.0 will be an upgrade from EDI Claims 1.0 and is designed to reduce paper use by enabling the electronic submission of workers' compensation forms and claims. The contract for developing EDI Claims 3.0 data services was awarded to Verisk Analytics/ISO effective November 28, 2016. Its implementation is scheduled to be complete on July 1, 2017. Trading Partners are encouraged to complete a registration at <https://iicedi.info/register> no later than March 17, 2017.
