Subject: RE: Question on Milliman Percentages

Hi Teresa,

The fee schedule amounts shown in table 2 are for hospital outpatient services, so those amounts are calculated according to a different fee schedule (OPPS / APC) for facility charges. The professional surgery allowables are shown in table 6, which are calculated according to the RBRVS fee schedule amounts.

The % difference calculations that I did on table 9 represent the ID fee schedule / Milliman average. Your percentages are pretty much the same as mine except yours show the % *above* the Milliman average. I reported it as a % *of* the Milliman average.

I hope that helps. Please let me know if you have any other questions.

Subject: RE: Question on Milliman Percentages

I looked at a few of the surgical procedures provided on Milliman's list and I'm unable to match the IIC fee schedule from 2016 with the fees indicated on table 2. Here are just a few of the codes. The IIC fees I have listed are based on the RVUs and the conversion factor in 2016. Does the Milliman figure have additional services added into the fee for the APC code?

CPT	IIC CY16 Fee Allow	2016 Milliman Marketscan Allow	Milliman Report Indicated IIC Allow
23410	\$3,196.80	\$5,620.00	\$9,486.93
29806	\$4,151.25	\$5,761.00	\$9,486.93
29824	\$2,605.50	\$3,074.00	\$4,573.47
29880	\$2,195.10	\$3,464.00	\$4,573.47
49650	\$1,096.13	\$5,665.00	\$7,638.69
63030	\$3,808.35	\$6,586.00	\$9,486.93
64483	\$ 288.64	\$ 817.00	\$1,117.16
64721	\$1,532.64	\$2,149.00	\$2,658.57

Subject: Question on Milliman Percentages

Hello Patti,

I have a question on the percentages provided on table 9 of the packet titled Idaho Industrial Commission Negotiated Rulemaking June 22, 2017. It looks like the percentage indicated in the Idaho WC % of Milliman Non-Facility Average would be the percentage difference of the CY16 IIC fee schedule and the average of the fees provided by Milliman. Am I understanding this table incorrectly? When I do the calculations comparing the IIC and Milliman fees, I come up with lower percentages.

This table shows the comparison of the IIC fees compared to the Milliman allowables.

CPT	IIC CY16 Fee Allow	2016 Milliman Marketscan Allow	IIC % of Milliman Average
99202	\$147.70	\$110.00	34.27%
99203	\$213.50	\$160.00	33.44%
99204	\$324.80	\$245.00	32.57%
99212	\$ 86.10	\$ 64.00	34.53%
99213	\$143.50	\$112.00	28.13%
99214	\$211.40	\$165.00	28.12%

Appreciate your assistance so I can read the tables correctly.
